

PreDesign Roadmap

Last updated by Andrea Bowman on Oct 30, 2024

When starting the predesign phase of the project, use this list as a roadmap to guide you through the process. Ensure that each of these items are reviewed and checked off before heading into Schematic Design.

Programming Roadmap

How to Use the Roadmap

First download the PreDesign Roadmap file above and save it to your project folder. This file can now be modified for your project.

1. Open the checklist from your project folder.
2. Work your way through all of the items on the list with the project team.

Final Steps

Once the PreDesign and Programming package has been submitted to the owner, confirm that you are authorized to proceed into the next phase which is Schematic Design.
